## AUTHOR'S APPRECIATION

The first edition of New World Atlas, Volume One was published October 12, 1991 in Socorro, New Mexico. The opening appreciation states: *"With sincere gratitude and love, I acknowledge the assistance of Lenard Toye whose untiring perseverance and support has enabled me to bring forth this first volume of the Ascended Masters' New World Atlas.*

*Lenard's focus of God Protection, through his Mighty I AM Presence, credits the sustainment of this work in all stages. He has truly exemplified love in action.*

*I thank Sherry Takala for her many hours of loving service to this work.*

*I also thank Dorothy Maville for her gracious assistance in perfecting the manuscript; and Athena, whose trust and courage assured the first printing of this publication."*

Since this is an updated work that includes excerpts of the Freedom Star World Map, it is also important to thank my talented friend Penny Greenwell, who worked for many long hours on the World Earth Changes Map model. It is truly a work of art!

It is with my deepest gratitude that I thank all Ascended Master students; who now awoken to make their contribution to our New World.

*Peace and eternal blessings,*

I AM THE LIGHT OF GOD  
THAT NEVER FAILS!

## TRIBUTE

This volume of earth changes information for the Americas, is the continuation of Saint Germain's love and work for the freedom of humanity. It was his cosmic focus which brought the flame of freedom to this new land, and he continues to fan that flame in serving as sponsor of the Americas in the Golden Age.

From the very beginning of this work, his presence has been here. He made his first physical, tangible appearance to me in 1983. Since the beginning of this published work in 1989, I have had hundreds of letters from other Ascended Master students, to whom he has appeared. It was his physical presence and request to Leonard Toy in February of 1990, that moved Leonard to offer himself of service to this work.

I have also received thousands of letters from many others who have purchased I AM America maps who have had visions and dreams of earth changes. There are also many other teachings which address the topic of earth changes. The I AM America Map has traveled to many Native American tribes and foreign countries. Those who have heard this message in workshops or through the map come from many walks of life. This beautiful message of life and love has crossed barriers of culture, economics, literacy, gender and age. It is truly another example of Saint Germain's masterful diplomacy.

The beloved Ascended Masters have always taught that we are all made in the image and likeness of God, and not one of us carries more divinity than the other. Clearly, the Ascended Master teachings are not an elitist movement, but have been brought to this planet to empower us equally and individually. There is not one of us who has more power than the other; or a special sanction from the Ascended Masters to be the only one. We are all divine inheritors made in the image and likeness of God; we all have a Mighty I AM Presence which we can call into action, and we can all ascend. The only difference is our experience and our choices made while having the experience.

The experience that I have been given is a body of work, dispensed by the Ascended Masters, and bridged by Beloved Saint Germain. It has been a privilege to do this work, and a privilege to serve and learn through the experience. It is a great honor to work with the Ascended Masters and their love and radiance has transformed my life.

All the information in this book was given by Ascended Masters, Cosmic Beings or Beloved Archangels, but all of it was bridged and sponsored by beloved Saint Germain. The series of earth changes maps and accompanying discourses are theirs and carries their radiance. Many times, before they would speak, you could see Saint Germain's form in the

## Copyrighted Material; Sample page 6 of 25

room. Great rays of violet and goldenlight taking form in the finer levels of third dimension. Then would come the humble request, "May I serve you?" These great beings, of expanded love, wisdom and power have come with only this request...to serve. Through their eternal love they offer their divine guidance. They have exampled that humanity can no longer walk the path alone and that we all need one another.

This volume is presented chronologically as the experiences happened. This book is not written as a literary work nor was it ever intended to be. With the exception of editing for sentence structure, it has been kept in its original form. This work is a message.

In the simplest interpretation, the message received from Saint Germain and the Ascended Masters is that the time has come for mankind to make a choice for collective world peace. It is time to make peace with ourselves and each other. It is time to live on a peaceful planet, freed from the threats of nuclear war and ecological breakdowns. As co-creators and caretakers of this planet, we have chosen a destructive path that now instigates acts of self preservation from the planet through cataclysmic but cleansing earth changes.

In a distinctive and individualized interpretation, this body of work reveals prophesy much like a diagnosis. In its earliest beginnings, Saint Germain revealed the source of this earth changes prophesy as coming from the sixth layer of the earth's electro-magnetic field, or aura. He also revealed that this body of work would be dispensed through the green ray, the ray identified with healing and scientific development.

Since we now know that disease in the human is first detected in the aura, the earth's field or aura is not different. What a great gift Saint Germain and the Masters have given us! This prophecy is akin to an energetic reading and there is time for us to do something. The time has come for all of us to awaken!

Awaken to your divinity!

Awaken to your co-creatorship!

Awaken to your world service!

As Saint Germain has stated, "Awaken, and then act."

It is then through the loving acts of compassion, forgiveness and service to one another and for our planet that we heal and choose the world we want to experience. We can choose a world filled with cataclysmic earth change or gently and gracefully usher in a peaceful and abundant millenium.

It is with great love, that I honor Saint Germain. It is in this prophecy that he reminds me and humanity of what we all know in our hearts...we have the *freedom* to choose.

In eternal peace and abundance, I AM,

Lori Toyé

F O R E W O R D

Greetings, beloved ones; in the breath, light and sound of The Most Radiant One!

This Atlas of Our New World is brought to all of mankind and humankind with the true sense of joy, love, and peace for all. Our New World is the reflection of our own creative thoughts and feelings. Saint Germain has said, "We only give you the energetic reasoning." In other words, this prophetic atlas is the reflection of how we all think and feel about ourselves, the planet and each other. The changes in this book are in the probability wave as of this writing. How the changes happen depends on each of you.

We are all in this together, even the messengers of this book. Your thoughts and feelings radiate through your aura or electromagnetic field and effect those around you. In turn, those around you pick up the energetic pattern and magnify this, passing it on to others. When you think less of others you also radiate this thought out into the world. Your judgements and criticisms magnify the negative of this world. There is only in existence what each of us individually and collectively think, feel and act upon. Please guard your thoughts and feelings because this is the basis of the changes to the planet and all our systems. Please be responsible for your thoughts and feelings, this is your God given co-creative energy!

The Masters have taught that we are cosmic beings who have come here to learn to co-create. The tools which we have been given are the abilities to think, feel and our will to do. This is our birth right to become a co-creator in this beautiful garden. You now know the tools and see the information of our shared creation. I invite you to come and co-create with your true hearts desire.

Come and create a new world of sharing, love and sustained peace. I AM,

Lenard Toyé

# GOLDEN CITIES

---

**December 21, 1988**

*On top of the map is a sheet of paper. They're writing across it Abundance, Prosperity and Healing and stressing the importance of these words. These words are to be directly associated with the new bay that forms in the Pacific Northwest.*

*There's a second set of words...Transformation, Harmony, Peace, more words associated with the bay that forms around Utah, Arizona and Colorado.*

*And now they are showing that a second vortex will be formed. There are three more pins. One is in Mesa, the lower pin. The size or configuration of this vortex is exactly the same as the vortex in the Northwest.*

*Q-So the one at Mesa would be in the same position as the one in our area?*

There will be another Golden City at the apex.

*Q-Does it have a name?*

It starts with G, and now they are writing the other letters, G O B E A N. Gobean. The vortex in the Northwest has a name, too, S H A L A H A H. Shalahah. They are showing me a gold star on what is now the Mexican and California border. They say this marks the location of an important mineral deposit.

*Q-Can you tell what the mineral is?*

It's gold ore, mixed with a black kind of substance. Now they are placing gold stars all over the map. There is more information regarding the vortexes. They overlap mathematically and geometrically.

*Q-Do they have more earth change information for us?*

---

The Mississippi River will almost cut the nation in two. It's much narrower at the top and widens quite a bit at the bottom. It's very wide down at the bottom and covers and takes a large part of Texas away, with Islands in the mouth of it.

*Q-Do you see the Great Lakes draining into it?*

The bottom lake drains near Chicago. There is another vortex by the Denver area. The location of the apex of the Gobeau vortex is between Mesa and Albuquerque. Denver is one of the western points to another central vortex.

There is a channel from the Bay of Harmony that goes right to the mountains of Denver. It will be a passage from the east to another apex up over the mountains to Denver, also a passage to the other river. This is a wide, fresh water river, and they are naming it The River of Cooperation because of the immense amount of cooperation which will occur between this river and the people living near it. Eventually, this becomes a source for irrigation, and the area surrounding it will become a strong agricultural area for the nation.

They are also showing that the lands in Eastern Montana and in the Dakotas are pretty much undisturbed.

*Q-Do you see any more changes?*

A new Continental Divide. A new mountain range will form. It starts in Central Canada, and follows the flow of the River Of Cooperation. It forms between what we know now as the Mississippi River and the Rocky Mountains, and extends down almost to New Mexico. In between the Rockies and the new divide a beautiful grassland is formed, it's beautiful. Close to where Denver is now.

*Q-Is this mountain chain close to the Mississippi River?*

The River of Cooperation follows the present channel of the Mississippi, only it is much wider. This new mountain chain is more into the Kansas area, and then continues to the upper eastern corner of New Mexico. The vortex on the east side of Denver is to provide a gateway through that mountain chain over that divide, from the Rockies to the new mountains.

*Q-Will the present Rockies by Denver sink some or will the new mountains just be that much taller?*

They will shift a little. It's more erosive than anything. But that erosion will take longer, into a period of time after the major changes, so will the new mountain range.

*Q-So that mountain range will not be there by 2,000 then?*

No.

*Q-But, I thought all the changes were supposed to be over by then?*

## Copyrighted Material; Sample page 19 of 25

No, they continue, but they are gradual, very gradual. This new mountain range will be formed in the Golden Age, they aren't giving a date for its formation, but it will begin to form at the onset of the Golden age and serve as a symbol to a great age. The new bay surrounding the Denver area will be formed before this age.

*Q-What do you see the rest of the coastline looking like towards Florida?*

There is a small part of Florida not there, and a portion of Maine that's gone. They are placing a pyramid on the map in the ocean waters near Florida, off the eastern coast. At the top of this pyramid is a gold capstone.

**SANANDA**

**December 9, 1990**

Welcome, my beloved brother and sister, I AM Sananda. I come forth this day to give you continued discourse on that which we call the World Project at this time upon your earth plane. Do we have permission to enter your energy fields?

*You most certainly have permission to enter my energy field. And I'm sure Lori would give her permission.*

Dear ones, we have come forth to offer this project to you, the world changes to occur upon the Earth plane and planet. We also have, come to bring you discourse or lesson, for you see this project was originated through beloved Sanat Kumara, many eons ago and this is its completion; for he has expanded on the laws of the cosmos as a creative pattern.

There are, as you understand, several reasons for what has come forth. Change is a continual process, and it is most important that humankind understand that change is the pathway whereby growth is achieved. This is, indeed, the seventh time that the earth will go through what you call a shift, a shift not only of the poles themselves but of the electromagnetic currents that run through her energy fields.

This shift in energy will occur from her sixth to her seventh body, preparing humankind to enter into what is called the fourth dimension. You, as third dimensional, beings are being prepared to enter into a fourth dimension awareness.

As I have stated before there are Twelve Jurisdictions to accompany this work. The theme of earth changes is to be understood in its entire context. I shall recognize those who have helped tirelessly with this effort and work:

Beloved St. Germain, sponsor of the Americas.

Beloved Mary, keeper of that which is the Cradleland, also known as South America.

Beloved Kuan Yin, who has stepped forth to sponsor the Asian continent.

Beloved El Morya, whose directive focus is shared in America, and in Europe.

## Copyrighted Material; Sample page 22 of 25

Beloved Kuthumi, who has generously given his light to America, and also holds the channel and light for Africa.

There are many more to follow and many more will come forth. Many, too numerous to mention. There is indeed, beloved Nada, who holds her radiance and presence within England. There is also beloved Paul, who comes to set the seal of his radiance and brilliance in the Central American areas. And, most assuredly, the seven beloved Archangels shed their rays on the entire planet. And who stands at the North and South poles? Beloved Archangel Michael. And who is that who sheds the ray of golden radiance around the equator and surrounding the planet in eternal love, but Archangel Chamuel.

So you see, dear one, this is a method of cooperation and we work in harmony, which is, indeed, the topic of our first Jurisdiction, Harmony.

Beloveds, you have been brought here to create. Not only are you creative beings, but you must learn to create in full cooperation with one another. You are, at times, like small children in a sandbox. Designing your castle, each of you has the same sand, the same amount of water, and yet as one designs the building that is his there is always someone who comes forth to throw sand or to destroy what his brother or sister has made. So each person then rebuilds again. It is time for you to let this go! It is time for you to work in cooperation and harmony! Together, for you are in this truly together. Not only have you shared genetic code, you are on this planet as one body of light. It is time for you to come forth and cooperate.

Harmony comes forth for the blending of creative waves. Harmony comes forth when all has achieved balance. We have spoken of alignment and spoken of balance. Alignment must precede balance. Balance is, indeed, the maintenance of alignment. You have yet to achieve this upon your planet. There have, indeed, been times when she has become aligned, but the maintenance of alignment is balance, and this is yet to be achieved. We speak of the directive force within the will itself. For you see, dear one, mankind has long forgotten that will is to be directed only through love. Not through wisdom; wisdom is the application, but we speak now of direction.

What is the directive force? The directive force of the will is love. To understand this is to become aligned. And to maintain this universal law is to achieve balance. The maintenance of balance, dear ones, is the nature of our project. Not only is your planet mis-aligned, it is far from balanced. Earth changes have been brought forth to provide the creative space and pattern for alignment. You, as human beings, have long understood that all energy, in order to be sustained for creation must be maintained in balance. To draw from the well of creativity, to drink of its waters, the source must be replenished. And how does the source replenish? Through balance, dear ones.

*Q-Balance is the continuous cycle?*

It is the continuous cycle known as harmony.

And so upon your planet, do you not see the imbalance, the mis-alignment, and how this has come to be? Each continent is to become aligned. Ascended beings have come forth to sponsor, not to only keep the alignment, but to hold a focus for maintenance. That is why we are dispensing the information which you know as the energetic bodies of perfection. Man has long known that he was a body of light. But he has refused to recognize this within himself. And now this must be recognized for truly he must be responsible for what he has created. So you see, dear ones, you enter into the misappropriation of energy which allows a non-creative force to exist. You have referred to this as a black hole. And eventually, yes, you pull out of this hole into another dimension of creation. It is no mystery to the cosmos that the earth

## Copyrighted Material; Sample page 23 of 25

itself, through her inhabitants, has created a pattern, a pattern of imbalance, a pattern of disharmony and a pattern of misalignment. We have stepped forth as members of the Spiritual Hierarchy of the Great White Brotherhood not to duplicate this pattern, we have decided to expand it!

If you are to be a creative planet, dear ones, create in Harmony. If you are to create harmony, sustain your creation. We are here to assist you, dear ones. Harmony is your first lesson. I AM here, eternally yours. Are you ready for questions?

*Q-I will step back to the beginning, before the discourse started regarding the earth's electromagnetic field. Energetically, in the third density, mineral deposits and crystal structures and precious gem structures which are crystal structures, they carry the energetic stability of the planet, do they not?*

They have been set forth to hold the creative pattern.

*Q-Then indeed mineral deposits carry consciousness?*

They carry vibration, which, dear one, is a component of consciousness. Consciousness is a collective vibration.

*Q-Then with reference to the human body and the earth body comparison, mineral deposits function much the same way as acupuncture meridians do in the human body?*

To the earth planet, yes. They also serve as great centers for input and output for the flow of energy, what you have seen on the human body as a chakra point. They assist the planet much as you have understood your nervous system.

*Q-I see. That is the physical mode of how the human nervous system functions, so does the nervous system of the planet function through the mineral deposits?*

It does indeed. For this is how light travels, on electromagnetic current, which, underneath, if you were to isolate this further, is through sound. For sound precedes light.

*Q-As the biblical phrase, in the beginning, there was the word?*

This is true.

*Q-In addition, before the word there was the sound?*

Sound is the building block that light is built upon.

*Q-So all creation is based upon the first primary building block of sound?*

Sound that carries an electromagnetic field.

*Q-Not all sound carries an electromagnetic field?*

This is true, not all sound is qualified as creative wave.

*Q-So there are certain sound frequencies which work to create, to rebuild, to align, to restructure, to purify and cleanse?*

This is accurate, for do you not have the division of rays within light?

*Q-Yes. Now if we look at the bodies of water on the planet, which do they function on, the sound or the light, or both?*

You see dear ones, they function upon a wave and like a wave that comes to the beach. This wave has been predicated by gravitational pull. Beyond the gravitational pull is the energy of light. Light, again, that streams forth on the electromagnetic current. And what builds the electromagnetic current? That which is sound. Something as massive as an ocean contains within it the complete harmony and symphony of the elementals and the mighty elohim, those who step forward in service to the rhythmic, harmonic flow of sound on the electromagnetic wave.

## Learn The Prophecies From The I AM America Map In New World Atlas, Volume One!

See close-up maps that are very detailed and easy to read from the **I AM America United States Map**. This book contains 56 earth changes maps and 240 descriptive pages of prophecies from the Ascended Masters.

### 240 descriptive pages and 56 earth changes maps that include:

- Maps Of The United States
- The New Western Coast Of The United States.
